

OneStart: Your chance to win £100k (US\$150k) to realise your biotech business idea

Do you have an idea to solve a critical problem healthcare? Or do you have the scientific or business know-how to help someone else develop their idea?

The **Oxbridge Biotech Roundtable** (OBR) and **SR One**, the venture capital arm of GlaxoSmithKline, have teamed up again for the **OneStart** competition - the largest biotech startup accelerator programme in the world - to offer young innovators from **all disciplines** the chance to win **£100k (US\$150k)** with **free lab space at near London, UK** and **ongoing legal and business advice from our sponsors** to transform their ideas into a successful business.

Applications are now open until 1st December 2014. To learn more about the programme and start building your team, visit www.oxbridgebiotech.com/onestart.

Who should participate?

- **Science/medical students and researchers** interested in spinning out their research or commercializing their ideas
- **Business students and young professionals** keen to get involved in the biotech and healthcare industries
- **Software developers and engineers** interested in contributing their technical skills to realising a product
- **Anyone interested in entrepreneurship**

You do not need to have a team yet, or even have your own idea, as you can register now at our [Co-founder Hub](#) (and Discussion Forum) to find teammates to complement your strengths, show your interest to join other teams.

Ideas at **all** stages of development are welcome. All semi-finalists will be directly mentored by experienced industry professionals for at least six weeks, and invited to attend a biotech business bootcamp in London in February 2015 with workshops from our global sponsors, including SR One, Johnson & Johnson Innovation, Roche, McKinsey, and others.

We look forward to meeting you in person or via www.oxbridgebiotech.com/onestart.

If you have any questions at all, please do get in touch via sybil.wong@oxbridgebiotech.com. We would be happy to answer your questions about OneStart and help you move science forward to benefit human health.

Best wishes,
Sybil Wong
